Example applications in architecture

ARIES HOUSE

BRONCE ARQUITECTÓNICO® offers a third texture to its external facade, bringing a touch of exclusivity and distinction with a brightness that will look sensational both day and night.

LATAKIA HOUSE

Our *BRONCE ARQUITECTÓNICO*® is presented as the ideal sculptural architectonic solution that contributes to the perfect finish in exterior facades, giving the final touch of distinction and elegance to this beautiful double-height structure.

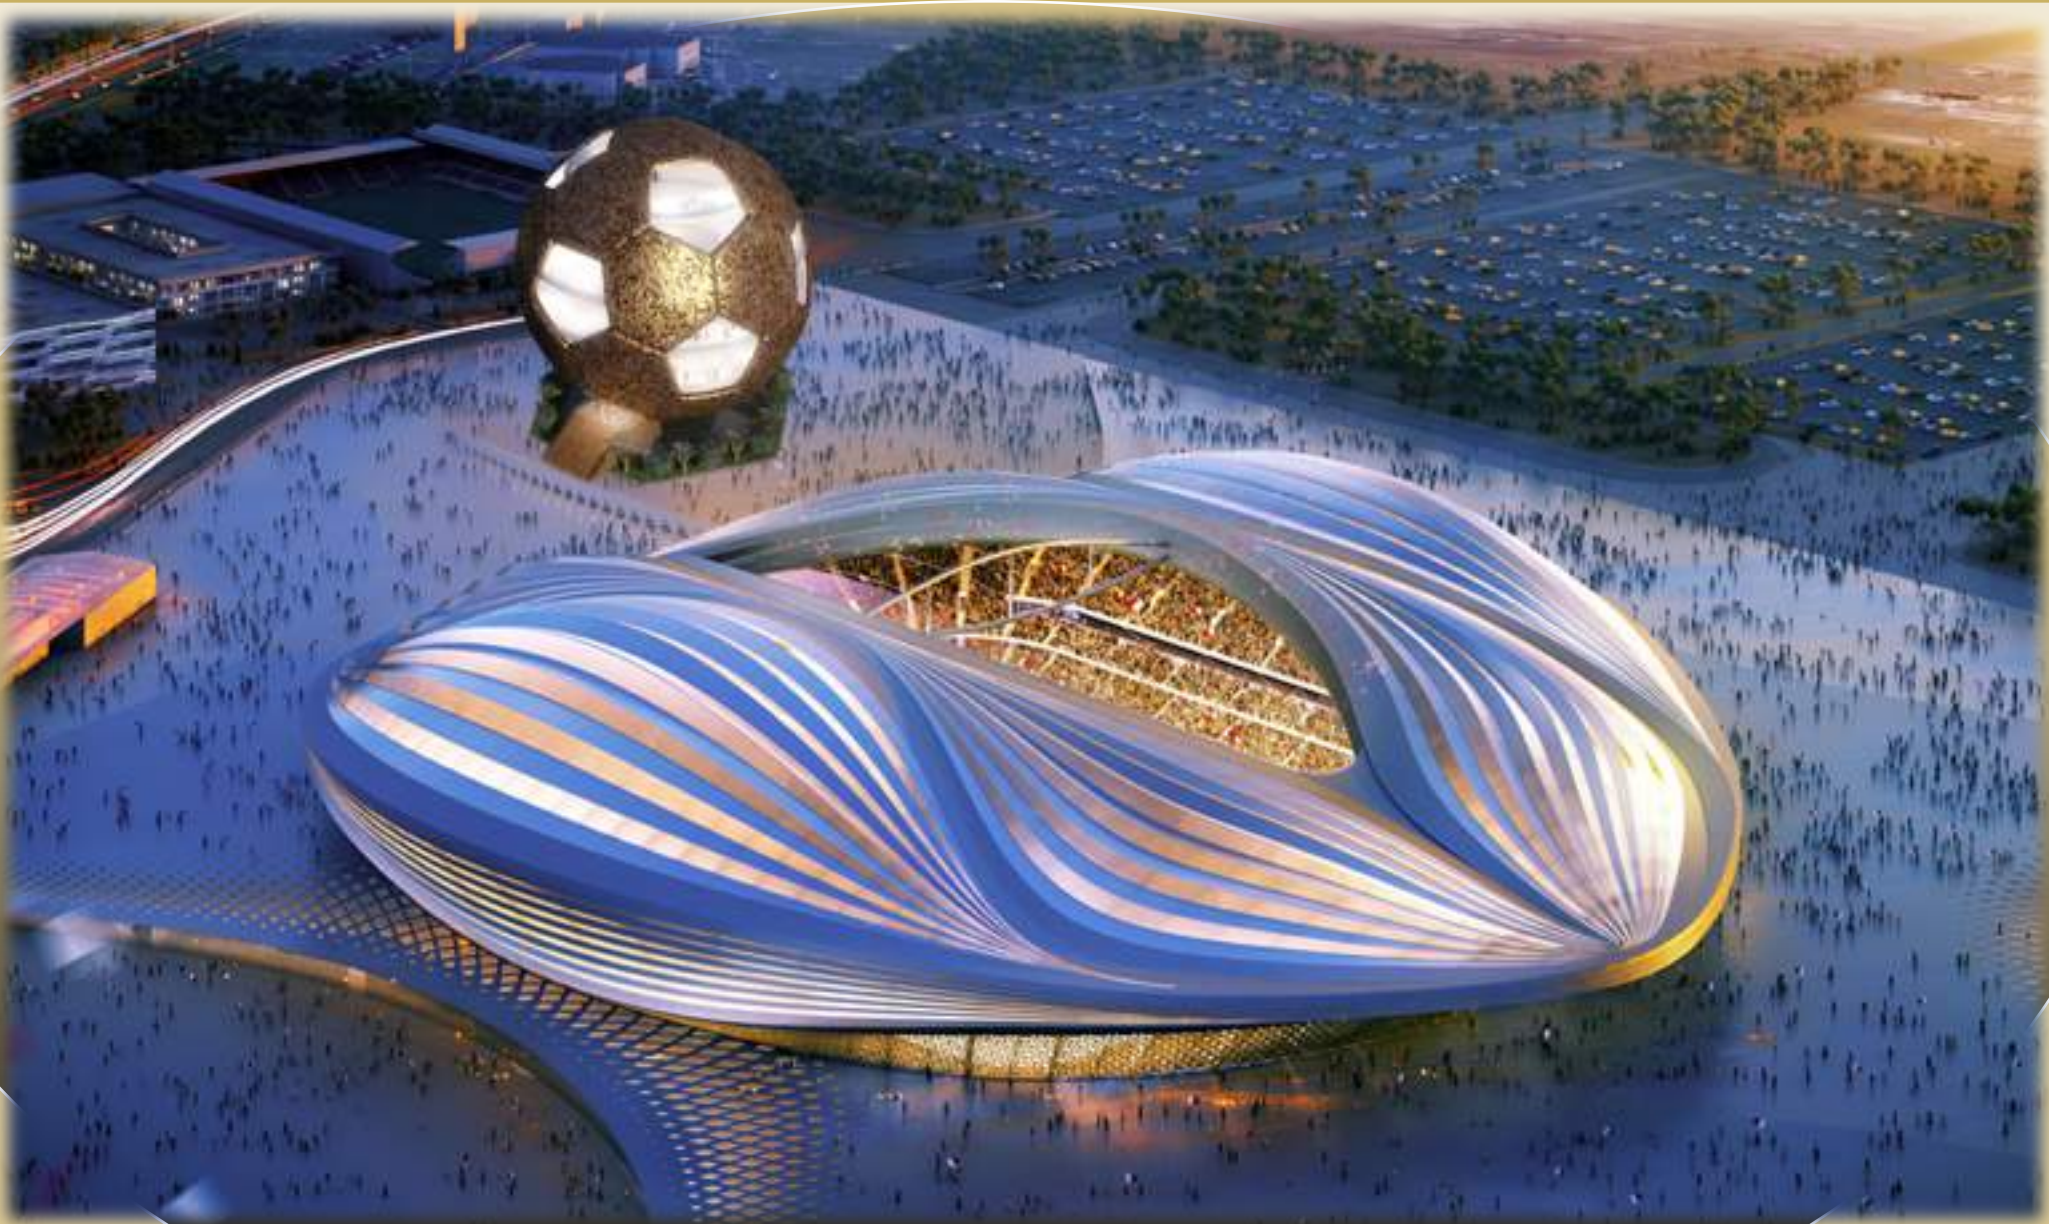

PYRAMID

PYRAMID's height is 65m and each base side is 100m long. This mega-building includes 11 floors, with a 10,000 m² ground floor.

Its exterior image can be modified, making possible to transform its facades, instantly, and in a real-time fully interactive way.

THE GOLDEN MEGA FOOTBALL BALL FIFA WORLD CUP
QATAR 2022

The Golden Mega Football Ball FIFA WORLD CUP QATAR 2022 is a 30 meters height building composed by 20 hexagonal and 12 pentagonal faces, with a unique golden texture. It would be the world's largest football ball, a symbol of the common space without frontiers that the football phenomenon represents, where millions of people meet and communicate around the planet.
